B Directly enter a stock to be searched and viewed.

Click  to save the search result as a TXT file on the user's PC.

Click  to save the search result as an Excel file on the user's PC.

C A list of stocks in the category selected in A or a list of stocks based on the search results described in B is provided.

D Intermediate Search and Keep Search Function Open functions can be selected

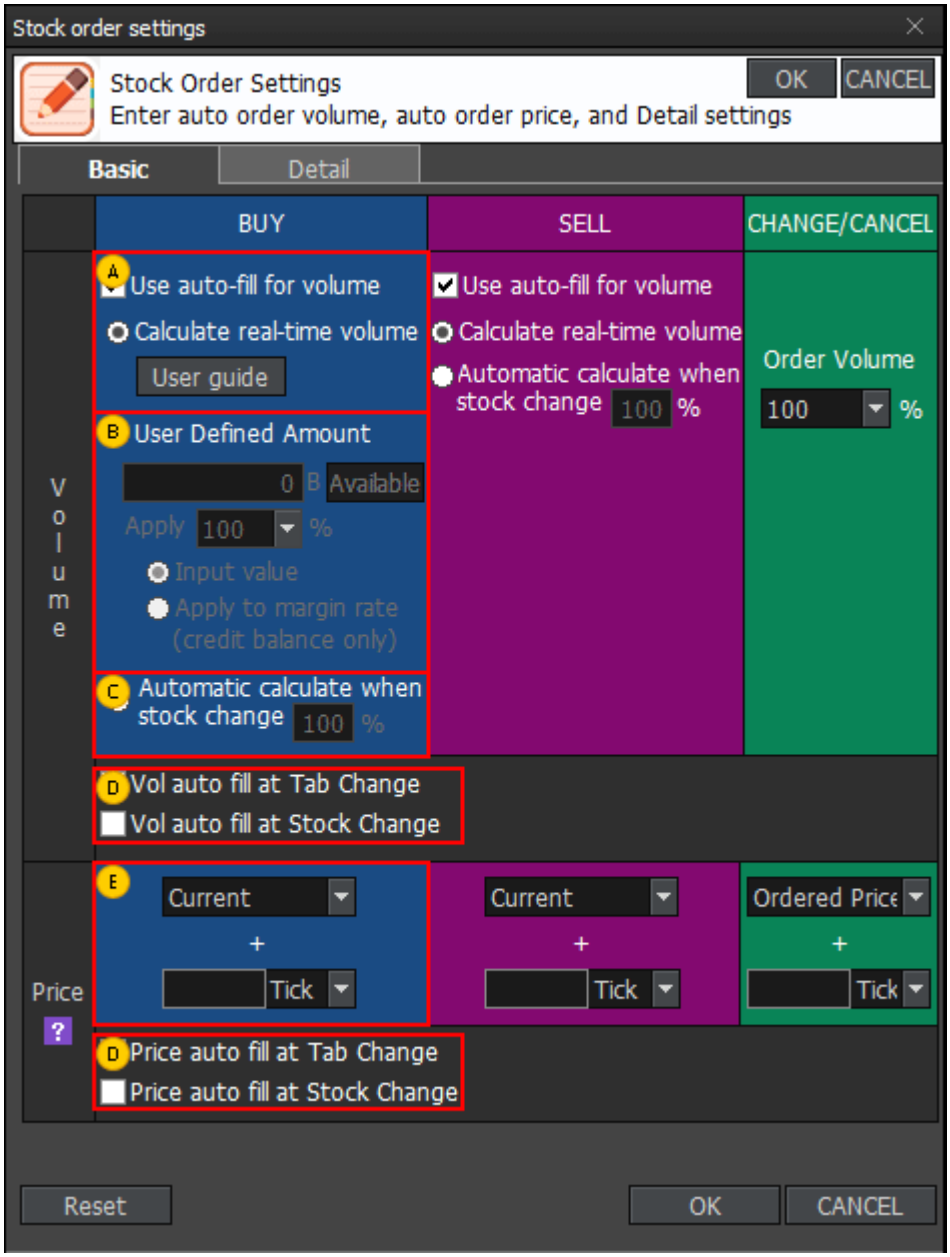

『Common Matters for Order Area』

1 Order Settings

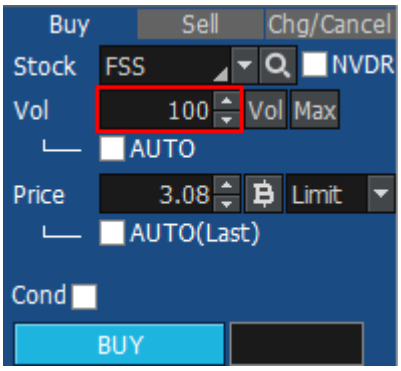

The order screen of FSS HERO allows for fast and convenient trading through configuration of trading volume and price settings.

In addition, various setting options are designed so that the user can decide settings based on personal trading environment and style, thus maximizing efficiency of trading. Various setting values are automatically changed on the trading window in real time when the stock is changed or bid/offer changes.

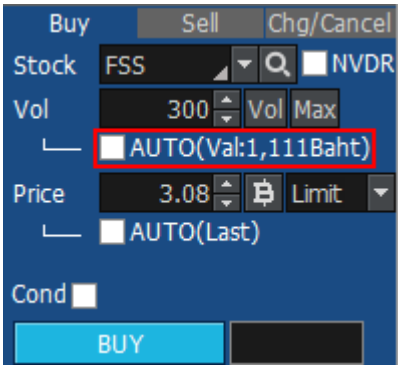

1 Basic

A Auto-fill for volume: Auto-fill for volume is a function that automatically fills volume reflecting account information such as deposit and portfolio, as well as real-time price, so that orders can be placed immediately.

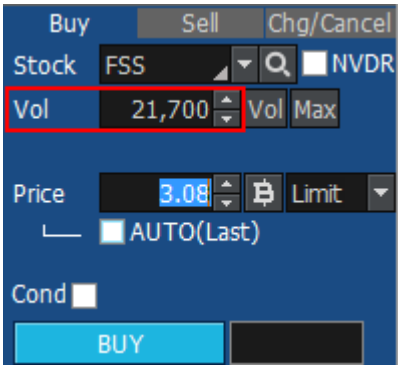

B User Defined Amount: Order amount can be adjusted by setting as a ratio of input value.

Ex) If 1,111 is entered into User Defined Amount and 'Input value' is selected, volume is calculated automatically based on 1,111 Baht entered by the user. If 50% is selected, volume is calculated to be 555 Baht (1,111 Baht × 50%).

C Automatic calculate when stock change – If this item is checked, volume is automatically calculated and entered as certain (%) selected by the user whenever the stock is changed.

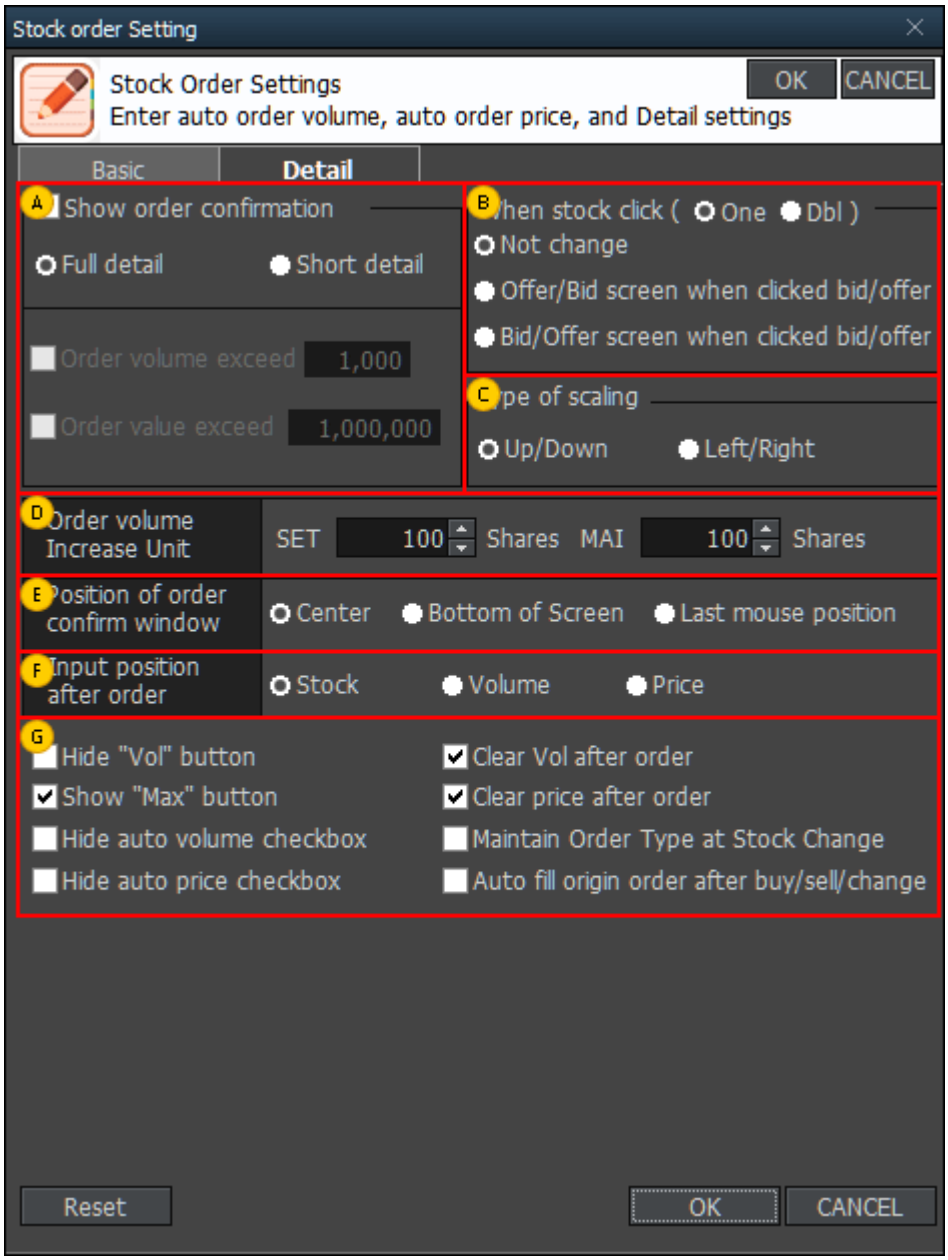

D When changing tab or stock, order volume and price can be filled automatically.
If 'Price auto fill at stock change' item is selected, bid/offer price is filled automatically as price of "Buy, Change/Cancel or Sell" order whenever stock is changed.

E Order price is entered automatically according to designated tick or %.

F When changing tab or stock, order volume and price can be filled automatically.

3 Detail

A Order confirmation can be shown in full detail or short detail.

B Event for one clicking or double clicking of stock can be selected.

C Type of scaling buttons can be selected between up/down and left/right.

D Increase unit of order volume can be designated by the user. Default order volume is 100 or 50 stocks depending on price, but it can be set by the user for fast order placement considering size of deposit in the user's account.

E Position of the order confirmation window can be designated.

F Input position after order can be designated.

G Various options such as showing of order window buttons can be set.

『Order Type』

- **Limit** : Limit order is an order to buy or sell at a specified price.
- **MKT(Market Order)** : A market order is an order to buy or sell a stock at the best available price. A market order can be matched at more than one price level. Unmatched quantity (if any) will be automatically cancelled. Market orders are allowed only during open trading sessions.
- **MP(Special Market Order)** : A special market order is an order to buy or sell a stock at the best available price. Such an order can be matched at more than one price level. Unmatched quantity (if any) will be converted to a limit order at a price of one tick better than the last executed price. Special market orders are allowed only during open trading sessions.
- **MTL(Market-to-Limit Order)** : A market-to-limit order is submitted as a market order to execute at the current best market price only. Unmatched quantity (if any) will be converted to a limit order at price equal to the last executed price. Market-to-limit orders are allowed only during open trading sessions.
- **ATO(At-The-Open Order)** : An order to buy or sell a stock at the session's opening price. ATO orders are allowed during pre-open sessions (morning and afternoon).
- **ATC(At the Close Order)** : An order to buy or sell a stock at the closing price. ATC orders are allowed only during pre-close sessions.
- **IOC(Immediate-Or-Cancel Order)** : An order to buy or sell a stock immediately at a specific price (limit order) on the condition that any remaining portion of the trade which is unmatched will be cancelled. IOC orders are allowed only during open trading sessions and are not allowed to be used with an Iceberg order or any market order type.
- **FOK(Fill-Or-Kill Order)** : An order to place a trade immediately and completely at a specified price (limit order); if the specified conditions cannot be met immediately, the order is cancelled. FOK orders are allowed only during open trading sessions, and are not allowed to be used with an Iceberg order or any market order type.
- **Publish(Iceberg Order)** : An iceberg order is a high volume order that has been equally subdivided into smaller lots so that only the portion of the total order which is currently being executed is visible. The broker specifies the subdivided portion of the order to be published in the order book. When the published portion of the order is executed, the next remaining suborder is made available for trade until the entire high-volume order has been executed.

  An Iceberg order is allowed only during open trading sessions, must be a limit-price order, and must be divided into no more than 100 suborders. Any unmatched portions of an Iceberg order in each trading session will be automatically cancelled by the system. In addition, when the trading of a particular stock is halted, all unmatched volume of Iceberg orders will be automatically cancelled.
