# 2. Description of Screen

#### 1 Bid/Offer Area

This is a bid/offer window that shows detailed information and 5 bids/offers of the selected stock. Especially, the stock to be viewed can be selected. Price of stock group can be viewed using rotator function, and there is a menu function that allows the user to write down memo and create a simple user database for each stock. In addition, HERO FSS allows the user to determine remaining volume of each bid/offer intuitively by displaying remaining bid/offer volume as bar graph.

Additional information can be changed by clicking souther buttons at the top right corner. Click souther button to configure detailed settings on the 'Setting' screen.

- Connecting screens function
  - A 0 : An order can be placed on the `[4000] Mini Order' pop-up screen.
  - B M : Most active stocks of the day can be viewed on the `[1100] Most Active' pop-up screen.
  - C G : Top gain/loss stocks can be viewed on the `[1101] Top Gain / Loss' pop-up window.
  - Image: Matching status of stocks can be viewed in mini screen on the `[3002] Stock Ticker' popup screen.
  - E H : Daily stock price status of the stock can be viewed on the `[3003] Historical Price' pop-up screen.
  - F C : Technical analysis can be performed on the stock on the `[6000] Technical Chart' pop-up screen.

G 🔣 🛛 : News about the stock can be viewed on the `[8000] Market News' pop-up screen.

H S : The stock can be comprehensively analyzed on the `[5000] FSS Conditional Scanner' popup screen.

#### 2 Match equalizer function

Recently matched volume is displayed using an equalizer to identify momentary strength of buy/sell intuitively

	900	420.00
	600	420.00
	1,000	420.00
	2,400	418.00
	100	420.00
	800	420.00
	700	420.00
-	200	420.00

#### 2 Order Area

There are two order windows in the order area, one at the top and one at the bottom. They allow the user to set two order conditions such as buy and buy or buy and sell, and place the most appropriate order depending on the situation.

#### **※** Precaution

If the same order screen is selected and order is placed using shortcut key, top/bottom orders are sent at the same time

A Select an account to place a buy order.

B Select a stock to order.

If **NVDR** is checked, a stock without voting rights for the stock selected by the user is selected.

C Enter order volume or click Vol button to select volume from the volume selection pop-up window.

Q	uantity/ (	Quantity ca	lculation w	ith %/ Qua	ntity calcul	ation to an	nount			
[	100	200	300	400	500	600	700	800	900	[
	1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000	stocks
Ĩ	10	20	30	50	60	70	80	90	100	%

#### 4 Favorites and Price Analysis Area

Favorites and investment information for trading are viewed on the right side of the screen. 'Favorites and price analysis' area can view prices of favorite stocks selected by the user, rank analysis, quote analysis, code search and theme item.

Favorites: Prices of favorite stocks can be viewed.

- 2 Rank Analysis: % up, up, % down and down ranks of the selected market can be viewed.
- Quote Analysis: List of stocks that show quote change can be viewed based on the designated conditions such as 'New High/New Low, Limit High/Limit Low'.
- Gode Search: A list of stocks that satisfy search conditions can be viewed.
- 5 Theme Item: A list of theme stocks that satisfy designated conditions can be viewed.
- Sector: This is a screen to view current index of industries constituting the market, volume, price information, up and down stocks, and hourly and daily index status.

7 Company Info: Yearly/quarterly company information of the selected stock can be viewed.

#### **5** Investment Information Area

Reference investment information including stock price data, market data and news can be viewed on the screen

- By Time: Hourly stock price trend of the stock on the day/previous day can be viewed.
- 2 Daily Stock Price: Daily stock price trend can be viewed as numbers and chart for the selected stock and date.
- Chart: `Day/week/month/minute/tick' mini charts of a stock can be viewed. As for the general chart, various indicators and analysis tools can be added and used.
- 9 Foreigner: Daily ratio of stocks owned by foreigners and change of trend can be viewed.
  - News: News for all stocks or news for the selected stock can be viewed
  - Unmatched: Current unmatched order status can be viewed at a sight.
  - Portfolio: Account portfolio information and account status can be viewed at a sight.

FSS

Estimated Matched: Estimated matched price of the stock at the time of opening or closing can be viewed.

## Common Matters for Bid/Offer Area

1 Selection of a stock to be viewed Enter or select a stock to be viewed.

Selection of a stock to be viewed

A The user can directly enter a stock to be viewed.

🕒 Click 🔽 button to open a list of stocks previously viewed

FS:	5	<b>∠</b> ▼ Q	
٩	FSS	FINANSIA SYRUS SECURITIES PUBLIC COMPANY	×
	ΡΤΤ	PTT PUBLIC COMPANY LIMITED	
	А	AREEYA PROPERTY PUBLIC COMPANY LIMITED	

Click 🔽 next to stock name to see 'Info' and 'Memo' for the selected stock.

Memo function allows the user to write down opinions and thoughts about a stock. This memo can be checked at any time on other screens. This is a simple user database for stocks that adds to price viewing function of the screen.

#### B Rotator mode

This is a mode that views price information of multiple socks according to the conditions set by the user (stock, direction, time, etc.)

- Forward: Price information of the selected stocks is rotated in forward direction of the list.
- Backward: Price information of the selected stocks is rotated in backward direction of the list.
- Manual: The user can manually click to decide rotating direction to view the selected stocks

Designation of rotator stock list

Double click a group from the group list for rotator view or click 🔻 button to show the selected

# **FSS HERO**

group in the selected group area at the bottom.

One group or multiple groups can be selected.

Click  $\blacktriangle$  button to delete the selected group.

0 After selecting the stock group for rotator view in  $\bigcirc$  , click Add button to save the selected

group.

Exclusion condition can be set for the stocks selected for rotator view.

#### Change additional information

Click E button at the top right corner of the screen to change additional information provided at the bottom.

#### Type of bid/offer setting

One of 4 types including 'Basic, Center, Left and Right' can be selected according to position of bid/offer data.

Basic Type divides bid and offer into left and right sides and arranges prices vertically. This type can clearly distinguish between bid status and offer status.

Center Type divides bid and offer into left and right sides around the center, allowing for easy analysis of bid and offer information.

Left Type and Right Type align bid/offer information in a line on the left side or right side.

HERO FSS offers different types of bid/offer alignment and additionally provides a graph that shows remaining volume of each bid/offer price. User convenience was maximized to intuitively recognize bid/offer information by providing different bid/offer arrangement types and graph for remaining volume of each bid/offer price.

**1** Registering on the current screen toolbar (C)

Select this option to register the current screen on the main screen toolbar.

#### 2 Standalone (D)

Select this option to recognize the current screen as a standalone window and freely move it out of the HERO FSS frame.

#### 3 Show on all virtual screen (V)

Select this option to show the current screen on all virtual screens in use.

#### Show the title bar (B)

The title bar at the top of the screen can be shown or hidden.

#### Send to Excel (X)

Data on the current screen can be sent to the Excel program. Data generated using 'Send to Excel' function is not saved. Data must be saved before closing the Excel program.

#### 6 Save as CSV (S)

Data viewed are saved as a CSV file of Excel. Click this menu, enter saving location and name, and click 'Save' button to save data.

# <sup>r</sup>Common Matters for Order Area<sub>J</sub>

#### 1 Order Settings

The order screen of FSS HERO allows for fast and convenient trading through configuration of trading volume and price settings.

In addition, various setting options are designed so that the user can decide settings based on personal trading environment and style, thus maximizing efficiency of trading. Various setting values are automatically changed on the trading window in real time when the stock is changed or bid/offer changes.

Auto-fill for volume: Auto-fill for volume is a function that automatically fills volume reflecting account information such as deposit and portfolio, as well as real-time price, so that orders can be placed immediately.

B User Defined Amount: Order amount can be adjusted by setting as a ratio of input value.

Ex) If 1,111 is entered into User Defined Amount and 'Input value' is selected, volume is calculated automatically based on 1,111 Baht entered by the user. If 50% is selected, volume is calculated to be 555 Baht (1,111 Baht  $\times$  50%).

Buy Sell Chg/Cancel Stock FSS Q Q NVDR Vol 21,700 Vol Max Price 3.08 E Limit AUTO(Last) Cond BUY

When changing tab or stock, order volume and price can be filled automatically. If 'Price auto fill at stock change' item is selected, bid/offer price is filled automatically as price of "Buy, Change/Cancel or Sell" order whenever stock is changed.

**E** Order price is entered automatically according to designated tick or %.

C Automatic calculate when stock change: Order volume can be entered in %.

0	Det

# Crder Type

• Limit : Limit order is an order to buy or sell at a specified price.

- MKT(Market Order) : A market order is an order to buy or sell a stock at the best available price. A market order can be matched at more than one price level. Unmatched quantity (if any) will be automatically cancelled. Market orders are allowed only during open trading sessions.
- **MP(Special Market Order)** : A special market order is an order to buy or sell a stock at the best available price. Such an order can be matched at more than one price level. Unmatched quantity (if any) will be converted to a limit order at a price of one tick better than the last executed price. Special market orders are allowed only during open trading sessions.
- MTL(Market-to-Limit Order) : A market-to-limit order is submitted as a market order to execute at the current best market price only. Unmatched quantity (if any) will be converted to a limit order at price equal to the last executed price. Market-to-limit orders are allowed only during open trading sessions.
- ATO(At-The-Open Order) : An order to buy or sell a stock at the session's opening price. ATO orders are allowed during pre-open sessions (morning and afternoon).
- ATC(At the Close Order) : An order to buy or sell a stock at the closing price. ATC orders are allowed only during pre-close sessions.
- **IOC(Immediate-Or-Cancel Order)** : An order to buy or sell a stock immediately at a specific price (limit order) on the condition that any remaining portion of the trade which is unmatched will be cancelled. IOC orders are allowed only during open trading sessions and are not allowed to be used with an Iceberg order or any market order type.
- FOK(Fill-Or-Kill Order) : An order to place a trade immediately and completely at a specified price (limit order); if the specified conditions cannot be met immediately, the order is cancelled. FOK orders are allowed only during open trading sessions, and are not allowed to be used with an Iceberg order or any market order type.
- **Publish(Iceberg Order)** : An iceberg order is a high volume order that has been equally subdivided into smaller lots so that only the portion of the total order which is currently being executed is visible. The broker specifies the subdivided portion of the order to be published in the order book. When the published portion of the order is executed, the next remaining suborder is made available for trade until the entire high-volume order has been executed.

An Iceberg order is allowed only during open trading sessions, must be a limit-price order, and must be divided into no more than 100 suborders.

Any unmatched portions of an Iceberg order in each trading session will be automatically cancelled by the system. In addition, when the trading of a particular stock is halted, all unmatched volume of Iceberg orders will be automatically cancelled.
